SIEMENS
energy

designed Condenser System Protected using plastocor[®] technology by Arudra Engineers.

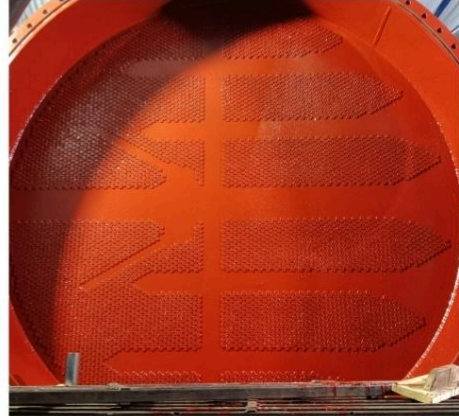

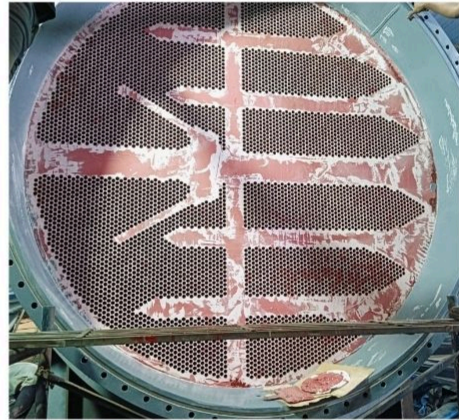

Globally, innumerable condensers designed by SIEMENS ENERGY have been protected with plastocor[®] technology.

Arudra has now helped protect a SIEMENS designed condenser system, manufactured in India with the plastocor[®] Cladding and High Performance Coating system.

Protecting Condensers prior to commissioning with the plastocor[®] system eliminates any foreseeable tube to tube-sheet leaks or galvanic corrosion issues for decades to come – thus helping plant owners save enormous time and money over the course of operation.

Arudra will also be installing the plastocor[®] system for 2 other SIEMENS designed condensers over the course of the current financial year.

Arudra is a trained and Approved Applicator of plastocor[®] Technology: plastocor[®] coating systems & plastocor[®] coating materials supplied by plastocor International SA.
